

Build with Confidence

Access a National Supply Chain of pre-approved contractors, using the UK's leading procurement platform for Construction

Clients can quickly access a National database of pre-approved contractors for their construction & development projects, streamline internal processes and reduce their capital budgets with ConstructDPS

National Supply Chain

Source and engage from our National database of compliant contractors, covering a wide range of trades and services. Contractors join the scheme for FREE, can showcase their business and demonstrate compliance by completing their online profile.

Drive Governance: (oversight)

Gain oversight and transparency across Frameworks, projects, procurements, and supply chain. Deploy OJEU compliant processes across your teams and gain intelligence over all your construction and development activities.

Deliver Efficiencies

Our platform has in-built flexible processes that will deliver efficiencies across your teams. Share projects, view contractor profiles, run EOI's and mini competitions and perform awards all in one simple to use application.

Cashable Savings

The scheme has been designed to 'unlock' significant levels of cash for Clients. Unlike many other frameworks, there are no fees (of any type) at any time for suppliers. Instead, the client benefits by receiving the true construction costs (which have not been inflated to cover 3rd party fees).

Strong Value Case

The scheme has been designed to 'unlock' significant levels of cash for Clients. Unlike many other frameworks, there are no fees (of any type) at any time for suppliers. Instead, the client benefits by receiving the true construction costs (which have not been inflated to cover 3rd party fees).

Collaborate across

Collaborate with likeminded clients, contractors, and your internal teams to help build the UK's strongest and most diverse Supply Chain, delivering better and fairer outcomes for all involved.

Easy to use online portal

Our cloud-based platform is easy to use, has unlimited access for your teams, requires minimal training and is easy to implement across your organisation.
